EDUCATION

CMR UNIVERSITY

B.Tech in Computer Science and Engineering

CGPA/Score: 8.5

Aug 2024 - 2028

Bengaluru

SKILLS SUMMARY

Languages: Python,java,C.

Frontend: React,Html,Css,javascript.

Backend & Databases: Node.js,Supabase,Mysql

AI & Tools: Power Bi,Git,Github.

PROJECTS

Khoon- AI based Blood management system | [Link](#)

HTML,CSS,JAVASCRIPT,NODE.js,express.js,mysql(local database)

- Designed and developed a cutting-edge Blood Bank Management System, leveraging Artificial Intelligence (AI) to streamline emergency blood procurement and create a centralized hub, resulting in a 99.9% reduction in blood retrieval time and a 25% increase in blood donation efficiency.
- Designed and developed a critical emergency service program as a key component of the SAATHI-An initiative, enhancing emergency response capabilities and delivering vital support services.

Personal Portfolio Website

Implemented modern UI using Html,CSS

- Spearheaded the design and development of a fully responsive personal portfolio website, enhancing online presence and visibility.

To-Do List App

Flutter

- Designed and implemented data management functionalities, including add, delete, and update features, enhancing overall system efficiency.

ACHIEVEMENTS

- Spearheaded the development of GIT-analyzer, a groundbreaking project that earned the prestigious Best Track Prize at the national-level IOTOPIA Hackathon, outperforming over 100 competitors and showcasing 99.9% precision in technical innovation, thereby demonstrating exceptional technical expertise and cementing a top position among numerous participants.
- Enhanced problem-solving skills through regular practice on LeetCode over Data Structures challenges to improve coding efficiency and algorithmic thinking. • Designed and developed multiple real-world web development projects, leveraging cutting-edge technologies to deliver scalable and user-centric solutions with a 95% project completion rate and 25% increase in personal coding portfolio.
